Coursera || Udemy

PROJEJCTS

OVERVIEW

Currently iam working on personal projects to build my portfolio.In my project based learning arena i have gained some good experiences in web technologies which includes wireframing,design, ui/ux, frontend ,backend and database management of web application.The reason which i know that iam far better than most developers is my way of writing code. I always ensure clean code,problem solving,robustness ,scalability of web application and reusable components which make me good developers from most of developer.Currently I am working on full stack web apps which i do not deployed yet which can seen in my github.some of my frontend project is given below
