SUMMARY

Software Engineer who wrote his first line of code 5 years ago and has since built production systems across backend, full-stack, cloud, and AI. 1.5+ years of professional experience with Node.js, React, AWS, Kubernetes, and microservices, including leading the development of a platform that synchronized 150K+ products.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Next.js, React Native, Node.js, Express.js, Python, FastAPI, HTML5/CSS3, Tailwind CSS, Redux Toolkit, MUI, ShadCN

Databases & Storage: MongoDB, Mongoose, PostgreSQL, Redis, Supabase, Prisma, Elasticsearch

Cloud & DevOps: AWS (EC2, EKS, ECR, S3, CodeBuild), Linux, Bash, Kubernetes, Docker, CI/CD, Nginx, PM2

Architecture & Messaging: Microservices, Modular Architecture, REST APIs, WebSockets/Socket.IO, RabbitMQ, BullMQ

AI / LLM & Tools: OpenAI, Google Gemini, OpenRouter, Chatbot & AI Service Integrations, Git, GitHub, Bitbucket, Stripe API

EXPERIENCE

Elexoft Technologies

Wah Cantt, Pakistan · On-site

Full-Stack Software Engineer

Oct 2025 – Sep 2025

Technical Lead — Conn1

- Lead a 5-engineer team building Conn1, a middleware platform integrating 150,000+ products from external dropshipping APIs with WizBay.
- Architected a microservices system deployed on AWS EKS, owning the project end-to-end from design through deployment.
- Direct code reviews, debugging, and key technical and architectural decisions across the team.

Full-Stack Engineer — WizBay

- Contributed as full-stack engineer to WizBay, a large-scale multi-vendor fashion marketplace for a European (Greece-based) client, spanning feature development, API integrations, and backend/frontend work.
- Helped set up CI/CD with AWS CodeBuild and defined the initial Kubernetes infrastructure supporting the platform's migration from a monolith to microservices.

Smile Lounge Dental Care

Remote · Part-time

Web Engineer & SEO Consultant

Apr 2026 – Jul 2026

- Built and launched the company website, managing its domain and technical web setup from development to deployment.
- Implemented SEO strategies and on-page optimizations to improve the website's search engine visibility and organic reach.
- Managed Meta Ads campaigns and provided advertising strategy consultation to increase patient inquiries and online visibility

6pm Media

Saddar, Peshawar, Pakistan · On-site

Software Engineering Intern

May 2024 – Aug 2024

- Designed and implemented backend architecture for a course LMS using Express.js, MongoDB, and Mongoose.
- Built authentication using JWT custom auth, course listing, enrollment, and category-based API routes.
- Build pixel to pixel UI from figma design , and integrate it with the backend. Gain exploration of game development tools.

PROJECTS

Multi-Vendor E-Commerce Fashion Marketplace — Final Year Project

Dec 2024 – Apr 2025

- Built a scalable fashion marketplace on the MERN stack with a React Native mobile app, supporting buyers, sellers, and admins.
- Implemented WebSocket-based real-time chat, reducing buyer-seller response time by 70%, integrated Stripe payments and JWT/Google OAuth.
- Add reels based shopping increasing buyers ui experience by 50% along with grid based listing.
- Designed MongoDB schemas for efficient variant/inventory management deployed backend on Render and frontends on Netlify.

Background Remover & Resizer AI Web App

Sep 2024 – Oct 2024

- Built a full-stack AI web app (React + Express.js) integrating Imgly Api and Sharp to automate background removal and resizing, cutting manual editing time by 90%.
- Deployed the backend on render web service, and frontend on netlify.

EDUCATION

Iqra National University

Peshawar, Pakistan

Bachelor of Science in Software Engineering

Sep 2021 – Sep 2025

Relevant Coursework: Software Methodology, Web Engineering, Programming (JavaScript, C++), Database Management, Software Requirement Engineering, Cloud Computing, Artificial Intelligence, Software Re-engineering.
