Education

Iqra National University

Bachelor of Software Engineering(BSE)

Sep 2021 – Sep 2025

Peshawar, Pakistan

Relevant Coursework

- Software Methodology
- Web Engineering
- Programming (JS, C++)
- Database Management
- Software Requirement Engineering
- Cloud Computing
- Artificial Intelligence
- Soft Re-engineering

Experience

Software House | 6pm media

May 2024 – Aug 2024

Software Engineer Intern

Saddar, Peshawar, Pakistan

- Designed and implemented backend architecture for a course LMS using Express.js, MongoDB, and Mongoose, following clean coding practices.
- Developed authentication (JWT, bcryptjs etc), course listing, enrollment, inquiry handling, and category-based API routes.
- Collaborated on frontend development and contributed to Figma UI design improvements.
- Gained exposure to game development workflows and mentored junior interns in JavaScript fundamentals.

Freelance Project| AI-powered Itinerary Generation

Feb 2025 – Mar 2025

Web Full Stack - Prompt Engineering

USA, Remote

- Built an AI-powered itinerary platform using Google Gemini LLM that processes 20+ user preferences (dining, activities, budget) to generate hyper-personalized Detroit weekend plans, reducing planning time by 80% for travelers.
- Developed a SaaS-style partner portal with tiered subscriptions (Silver/Gold/Platinum) driving vendor sign-ups through featured placements.
- Engineered an admin control panel with CRUD functionality for user/partner/itineraries management.
- Created a responsive user journey from AI questionnaire to checkout.

Projects

Multi-Vendor E-Commerce Fashion Marketplace | FYP Project – Iqra National University

Dec 2024 - Apr 2025

- Full-Stack Development: Built a scalable fashion marketplace using MERN stack (MongoDB, Express.js, React, Node.js) with React Native for mobile, serving 3 user roles (buyers, sellers, admins).
- Real-Time Features: Implemented WebSocket-based chat, reducing buyer-seller response time by 70%.
- Secure Payments & Auth: Integrated Stripe API and JWT/Google OAuth.
- Deployment: Deployed backend on Render, and frontends on netlify.
- Database: Designed MongoDB schemas using mongoose for efficient variant/inventory management.
- AI Chatbot: Integrated Chatling AI to resolve basic support queries automatically.

Bg Remover And Resizer AI Web App

Sep 2024 - Oct 2024

- Developed a full-stack AI web app (React + Express.js) integrating Rembg and Sharp library to automate background removal and image resizing, reducing manual editing time by 90%
- Gain exposure to aws ec2 as i deployed the backend on ec2 virtual machine.

Technical Skills

Languages & Frameworks: JavaScript, React/Next.js, Node.js, Express, HTML5/CSS3/Tailwind/MUI/ShadCn etc.

Tools & Platforms: MongoDB/Mongoose, AWS EC2, GitHub, WebSockets, Stripe API, Chatling Ai etc.
